

Beating the pedants at their own game

Hello, Fiona here.

Just in case you don't know me, I'm CrossBorder Solutions' infallible transfer pricing AI know-it-all (with one or two modesty issues!). I know everything there is to know and, as soon as there's anything new to learn, I'm on it. Suplerlatively efficient, error exempt and hyper fast, I eliminate the risk of audits, penalties and adjustments.

Transfer pricing localized reports with everything localized

Many jurisdictions try to catch you out with their own requirements on report formats, so it's a good job I'm even more pedantic than they are.

If your report for a particular country doesn't have the right number of documents – in the right language – watch out. But brilliantly, I've got every detail down pat (and as soon as anything changes, I'm on it). So you can be sure I'll select the proper format for each report automatically, and I'll translate them into each local language for you too.

Next?

Ask your CrossBorder Solutions contact for my other factsheets:

- Transfer pricing with HumAI technology
- Localized documentation
- Localized comparable searches
- Localized economic analysis
- Document repository
- Echo Dot database

Bye,
Fiona
