

I don't search. I just find

Hello, Fiona here.

Just in case you don't know me, I'm CrossBorder Solutions' infallible transfer pricing AI know-it-all (with one or two modesty issues!). I know everything there is to know and, as soon as there's anything new to learn, I'm on it. Suplerlatively efficient, error exempt and hyper fast, I eliminate the risk of audits, penalties and adjustments.

Pain-free localized comparable searches

Picking the right comparables out of a database with millions of potential companies? Needles in a haystack doesn't come close! Brilliantly, I evaluate 2.7 billion data points – covering descriptions, financials and websites – to find the perfect comparables for you.

My searches aren't just a zillion times faster and more exhaustive than the current approach, they'll also save you a pretty penny. And since I'm instantaneous, you can use me to run planning scenarios and even calculate your uncertain tax position.

Next?

Ask your CrossBorder Solutions contact for my other factsheets:

- Transfer pricing with Hum**AI**n technology
- Localized documentation
- Localized economic analysis
- Localized reports
- Document repository
- Echo Dot database

Bye,
Fiona
