

Reporting ahead of the game

Hello, Fiona here.

We all know that every year you need to complete and sometimes file your country-specific report. In most cases, to comply with the regulations, it's necessary to update the comparable search and economic analysis every year. Well, I've learned a new skill that makes this easy peasy!

Updating reports automatically

Updates are simple when you leave it up to me. You don't even have to ask! Sixty days before the due date, I will automatically update your previously completed transfer pricing study, produce the report and leave it in your country specific repository. Of course, XBS's team of economists will review the work and ensure that it is correct and up to date. I can even email it to you if that makes your life easier. If you want the report sent to you on a different time schedule, just let me know and I'll adjust.

Of course, I will also let CrossBorder Solutions know that it is ready and highlight any data that needs updating so it can be finalized and filed.

So now, to stay in compliance, year after year, all you have to do is sit back, relax and smile. Some say it's magic, I say it's algorithmic genius.

Next?

To find out what else I can do, request a demo today.

Bye,
Fiona

Every year, I can automatically update your transfer pricing studies, without you even having to lift a finger. Well, maybe just the once, when you open my email message letting you know that it's done!
